

Keep your house fire-safe by cleaning up Fall Leaf Litter

Three places to clear:

1 Rooftops & Gutters

Clean all leaves, needles, and debris from your roof & rain gutters.

2 Beneath Decks & Porches

Keep these areas free of flammable material. Consider enclosing with metal screens or non-combustible skirting.

3 At least 5-30 feet from around your house

Keep the area around your house raked free of fallen leaves and needles, creating a buffer zone between your house and potential flammables.
